REAL-TIME
DATA.
REAL-WORLD
IMPACT.

Up to 60% of clinical development time and 40% of cost are spent on patient recruitment. Data can help, but simply accessing more data only muddies your decision making. With Covance, you get the right analysis on the right data to empower your studies. Recruit eligible patients that fit your protocol faster, identify and secure proven and/or new sites, forecast and measure progress more efficiently. With Covance's proprietary data, your program hits its mark.

*Average time savings based on an analysis of trials processed through Covance Central Labs with Protocol Finalization date after 1/1/2009 for the specific clinical indications. Past performance is not a guarantee of future results, and a variety of factors other than CRO performance can impact timing of clinical studies.
*Site Activation to Last Patient In, Phase I-IV.

Covance Inc. is the global drug development business of Laboratory Corporation of America Holdings (LabCorp). **COVANCE** is a registered trademark and marketing name used by Covance Inc. and its subsidiaries around the world.

LABCORP DATA

Find Patients That Meet Your Inclusion/Exclusion Criteria

Using LabCorp's real world, de-identified clinical laboratory data on over 150 million patients, we can identify candidates who meet your protocol's eligibility criteria and accurately model the impact that the protocol inclusion/exclusion criteria will have on the patient pool size.

30 Billion*
test results

Processes

PATIENT DIRECT

A Direct Connection for Finding Potential Participants

We have access to ~150 million patients and have a rapidly growing database of people that have given us permission to reach out directly to them for participation in clinical studies.

Faster Recruitment

by contacting patients directly

150 Million Patients

in the patient pool

Rapidly Growing Database

PATIENT INTELLIGENCE

Strengthen Your Protocol with Patient Insights

Design your protocol around actual feedback from potential patients to elevate your recruitment and retention rates.

Every day our data grows, deepening our insights to make your studies more efficient.

20+ Indications
as of September, 2018

Global VOP data collected across
~30 Countries

Critical, patient-centric insights extend your market outreach and strengthen your studies.
