

Accelerate Your Scientific Discovery with GlobalCODE® - A Unique Data Management System

Discover the benefits of unified specimen data

HOW EASILY CAN YOU ANSWER THESE KEY QUESTIONS?

Access integrated data in GlobalCODE® and reach critical decision points - faster.

GLOBAL SPECIMEN SOLUTIONS

An innovative service to accelerate scientific discovery

Create Actionable Insights with Highly Connected Data

Managing disparate, disconnected data sources and creating custom data aggregation tools can squander your resources, increase expenses and introduce unnecessary risks into your specimen management program. The GSS team will build, deploy and upgrade your system as part of our standard professional services. We maintain your GlobalCODE® database and manage the data feeds and loading from all relevant vendors. GSS manages the data across your protocols allowing you to utilize your staff and resources to drive innovation and insights across departments and programs.

LEVERAGE END-TO-END SPECIMEN LIFECYCLE MANAGEMENT WITH GlobalCODE®

Implement Risk-Based Monitoring Strategies

Proactively address risks before they impact your timeline by managing patient enrollment and tracking sites' compliance with sample collection requirements.

Accelerate Your Time to Data Lock

Perform rapid in-life study interventions and inform key decision points in your trial.

Facilitate data reconciliation and sample discrepancies before closeout activities to ensure your budget and timelines stay on track.

Perform Critical Analysis for Go/No-Go Decisions

Respond to any unexpected adverse events that can trigger the need for additional, last-minute specimen testing by quickly finding the right samples, identifying their location and verifying informed consent – key components for ensuring a quick turnaround time.

Rapidly Respond to Regulatory Requests

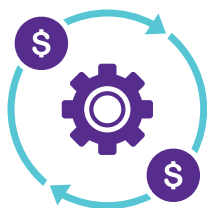

Easily identify qualified samples to use within the current study or across multiple studies with live-specimen data linked to codified informed consent and material transfer agreements, enabling further testing to support applications for marketing authorization.

Enable a Compliant, Cost-Effective Biorepository

Gain a new level of visibility into your sample status and ensure proper destruction according to consent to avoid excess storage costs with a clear understanding of your long-term storage while simultaneously increasing sample utility with a curated biorepository and informed consent codification service.

Your Key to End-to-End Efficiencies – From Specimen Collection to Destruction

- ▶ Reconcile patient visit data with the protocol
- ▶ Verify informed consent instantly
- ▶ View chain of custody and tracking information
- ▶ Access detailed breakdowns of test results with customized reports
- ▶ Work with a curated biorepository

Maximize your return on investment and uncover the true value of your specimen data – from collection to destruction – with GlobalCODE®. By enabling complete data integration with one single, comprehensive view of your specimens, GlobalCODE® delivers smarter, more cost-effective data management across protocols, programs and areas of research.

SPEND LESS TIME TRACKING YOUR SPECIMENS AND MORE TIME MAKING FASTER, DATA-DRIVEN DECISIONS.

Learn more about our drug development solutions at www.covance.com

Covance is a business segment of LabCorp, a leading global life sciences company, which provides contract research services to the drug, medical device and diagnostic, crop protection and chemical industries. COVANCE is a registered trademark and the marketing name for Covance Inc. and its subsidiaries around the world.
