

BIOPHARMA SOLUTIONS

Maximize the Value of Your Asset

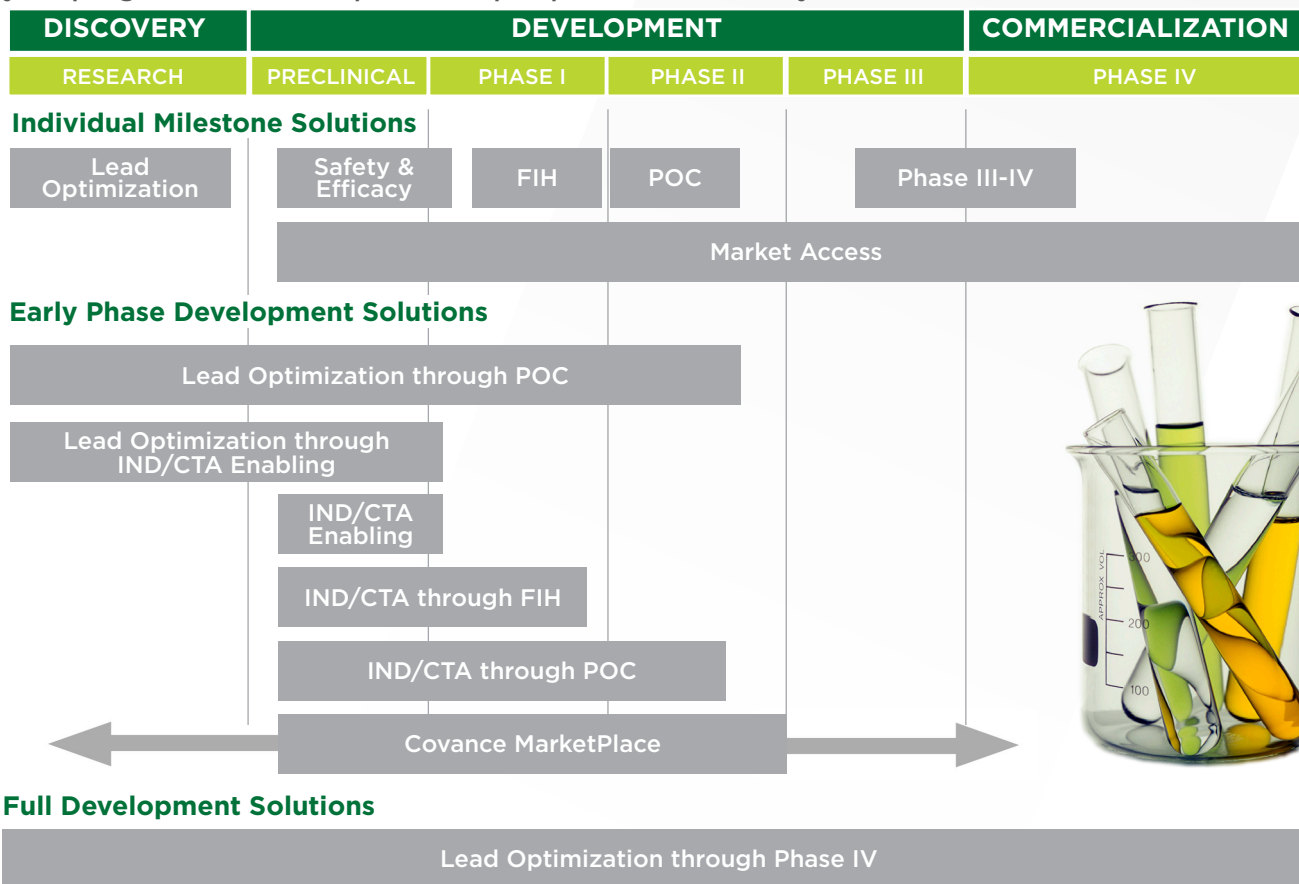

The journey of drug development can be complex and stressful. But, it doesn't have to be that way. Join more than 500 biopharmaceutical companies each year that partner with Covance to help manage their novel drugs through the development continuum. You get deep expertise applied to your program by working with a team that has managed more than 1,800 unique molecules and nearly 300 IND/CTA enabling programs in the past 5 years. Now, you can confidently enjoy development efficiency that spans preclinical, clinical and commercial phases.

Gain insights through solutions specifically designed to meet the needs of biopharma companies that can save you time and money while maintaining study quality and data integrity.

A unique solution that gives you:

- ▶ A dedicated team, with broad therapeutic expertise, that delivers continuity through study concept and execution, regulatory submissions and clinical trials.
- ▶ A drug development approach that minimizes risk and maximizes opportunities.
- ▶ Flexible processes and simplified financial options that help you meet the goals and milestones of your investors.

Get an unprecedented continuity of science, regulatory and process strategies throughout your program—for a CRO partnership experience unlike any other.

Optimize Your Probability of Success

Put the experience of the world's largest drug development database to work on your program. You have access to a global infrastructure and industry-leading nonclinical, regulatory and clinical expertise to ensure a tightly aligned, continuous solution to bridge your journey across key development milestones. That's why pharmaceutical and biotech companies have named Covance as their preferred partner for every stage of development.¹

▶ **COVANCE MARKETPLACE**

No matter what phase you are in, you can forge the right connection with potential partners, while safeguarding your asset through a unique networking solution called Covance MarketPlace.

▶ **LEAD OPTIMIZATION**

Minimize delays during the nonclinical and clinical stages of your drug development program by identifying the right molecule, revealing the one that best minimizes risk and maximizes efficiency.

▶ **EARLY PHASE DEVELOPMENT SOLUTIONS**

Get one consistent and dedicated drug development team with a single point of contact to advance your program seamlessly from nonclinical through first-in-human and proof-of-concept phases.

▶ **LATE-STAGE CLINICAL DEVELOPMENT**

Collaborate with a dedicated management team to efficiently navigate the complexities of drug development, such as simplifying trial protocols, optimizing the selection of trial site location, improving trial technology and accessing insight from global regulatory experts.

▶ **CMC SOLUTIONS**

From analytical testing to life-cycle management, build a strong strategy and overcome analytical challenges through Chemistry, Manufacturing and Controls support for both biologics and small molecule programs.

▶ **CENTRAL LABORATORY SERVICES**

Tap into the power of the world's leading network of central and specialty laboratories to access a wide range of comprehensive solutions. From standard testing to customized assays, you'll receive globally consistent and actionable data to meet your study's financial and time-line milestones.

▶ **MARKET ACCESS AND COMMERCIALIZATION**

Gain a clear understanding of your asset's clinical and economic value in terms that resonate with payers, providers, patients, investors and potential pharma partners. By combining perspectives in safety, efficacy, quality and commercial potential, you can quickly reach decision points and increase your ROI.
